

DURUM WHEAT

# RGT ANVERGUR

Up to Immoderation!

- Early wheat
- Very high and regular yield
- Good yellow index

Early BDC Quality  
 Registration 2012 CTPS North and South (SD81516B)  
 Obtained from RAGT 2n  
 RAGT Semences Representative

## FINAL CTPS QUOTE

111.9%

Of Northern Specimen  
 2011 (CULTUR + Pescadou)  
 2012 (Miradoux + Pescadou + CULTUR)

114.2%

Of Southern Specimen  
 2011 (SCULPTUR + Pescadou)  
 2012 (Miradoux + Pescadou + ISILDUR)

## BREEDER'S EXPERTISE

**ANVERGUR** has exceptional potential in all the regions. At this yield level **ANVERGUR** has a remarkable vitreous aspect.

**ANVERGUR** associates a good and light yellow colour with good speckling.

## Up to Immoderation!

### AGRONOMIC CHARACTERISTICS

Stem elongation	semi-early	3
Ear emergence	semi-early	6
Cold	intermediary	4
Height	quite high	3.5
Lodging	medium sensitive	5.5
Tillering	intermediate	
Physiological spot	hardly sensitive	

Source CTPS/ARVALIS - Institut du végétal and RAGT Semences for physiological spots

### QUALITY PROFILE

Quality class	BDC	
Specific weight	good	5.5
PMG		6.5
Protein content		5.5
Vitreous aspect		6
Speckling		7
Brown index		6
Yellow index		3.5
Proteins quality	intermediate	

Source CTPS or ARVALIS - Institut du végétal

**ANVERGUR**, VRSP variety (variety recommended by semolina and pasta manufacturers), this recommendation confirms **ANVERGUR** qualities.

## CULTURAL ADVISE

**ANVERGUR**, early variety with slow recovery of vegetation. **ANVERGUR** behaves well in case of diseases and cold. Adapt **ANVERGUR**'s cultural conduct in situations of risk of lodging.

## DISEASE PROFILE

DON	4
Fusarium	5
Brown rust	5.5
Oidium	6
Septoria	7.5
Yellow rust	8

Source CTPS or ARVALIS - Institut du végétal (1 = sensitive, 9 = resistant)  
 Resistance to diseases concerns diseases and strains actually known in France.
