

WESTERWOLD RYEGRASS

# **RGT SPEEDYL**

**High performance annual ryegrass**

- High spring yield
- Quick establishment
- High quality ryegrass

WESTERWOLD RYEGRASS

# RGT SPEEDYL

## VARIETY PROFILE

**Type**

Tetraploid

**Persistence**

6-12 months

**Use**

- Cutting: silage, hay
- Grazing

**Seeding rate**

30 kg/ha (pure)

## High performance annual ryegrass

### HIGH SPRING YIELD

**SPEEDYL** has been bred for its outstanding performance in trials against commercial standard varieties in the market.

**SPEEDYL** has a very quick establishment (possibility of grazing without spoiling the sward in autumn). Its very fast regrowth in the spring leads to huge yield at the first cut.

Thanks to these traits, **SPEEDYL** is ideal for producing forage very quickly.

### GOOD LEAFINESS AND SANITARY STATUS FOR HIGH QUALITY FORAGE

**SPEEDYL**'s very good sanitary status and very good leafiness offers high quality forage. Its good digestibility and quality increase food intake.

**SPEEDYL**'s quality has been proven for many years worldwide.

### TRIALS RESULTS

	<b>SPEEDYL*</b>	Behaviour compared to control varieties
First cut yield (T MS/ha)	<b>8</b>	<b>++</b>
Tolerance to brown rust	<b>8,2</b>	<b>+++</b>
Regrowth vigor	<b>6,4</b>	<b>+++</b>
Leafiness	<b>5,6</b>	<b>+++</b>
